XFS - format and project guide

PRE-RELEASE DOCUMENTATION

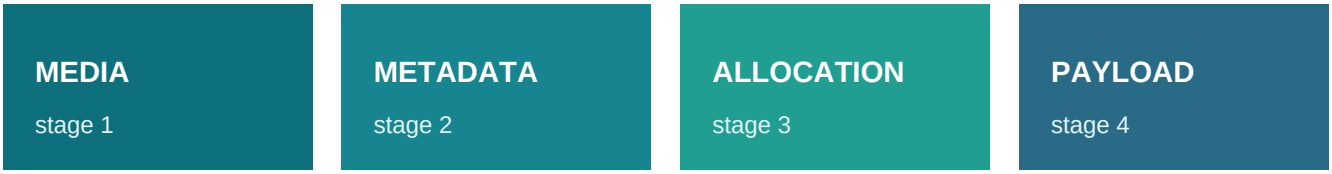
No qualified standalone package or native installer is published.

WHAT IS IT?

Extent-oriented journaling filesystem used for large files and scalable allocation.

CONCEPTUAL ON-DISK STRUCTURE

Format-specific structures vary; this is not a sector map.



PROJECT STATUS

Filesystem-XFS has an independent Infiltrator-Projects source repository. Its published README does not establish a qualified standalone Debian or RUN release. Driver capability, runtime integration and media-safety claims require separate verification.

TARGET INSTALLATION LAYOUT

/System/Filesystems/<qualified-module>.so

/System/Resources/Documentation/Filesystem-XFS/

XFS.pdf

This diagram is a future packaging target, NOT an installed release.

Engineering source and qualification reports belong in GitHub.
